CSC289 Programming Capstone Project

Project Name: Plague Village

Team Number: 6

Team Project Manager: Janay Snell

Team Members: Zoe Craig, Gavin McKenzie, Oscar Salinas-Villarreal, Maria Del Carmen Caballero Hernandez, Andrew Thanh Dang, Noah Yarosz

Release Report

Plague Village - Version 1.0

Overview

Plague Village is an interactive survival game focused on decision-making during a plague outbreak. This release represents the completion of the core gameplay experience.

Development Highlights

- **Project Initiation:**
  - Team formed and project idea selected
  - Initial concept: survival + branching decisions
- **Requirements Gathering:**
  - Identified core features: choices, outcomes, replayability
  - Defined basic UI and gameplay flow
- **Design and Architecture:**
  - Structured as a decision-tree system
  - Frontend handles UI, backend (if used) handles logic
- **Development Progress:**
  - Built core gameplay loop
  - Implemented decision branches

    - Designed UI for interaction
- **Challenges:**
    - Scheduling conflicts and communication issues
    - Delay in assigning Project Manager
    - Difficulty defining scope early
    - Scaling project to realistic size
- **Testing and Quality Assurance:**
    - Manual testing of decision paths
    - UI and interaction testing
    - Debugging logic errors
- **Bug Fixes and Enhancements:**
    - Fixed broken decision paths
    - Improved UI responsiveness
    - Cleaned up code structure

Deployment

- Project deployed locally / via GitHub
- No major deployment issues

Release Notes

- **New Features:**
    - Interactive decision-based gameplay
    - Multiple outcomes
    - Basic UI navigation
- **Bug Fixes:**
    - Fixed navigation errors
    - Corrected logic bugs in choices
- **Known Issues:**
    - Limited number of story branches
    - Some features incomplete due to time constraints
    - Minor bugs in UI

Conclusion

Plague Village successfully delivers a functional core experience. While not all planned features were completed, the project demonstrates strong foundations in design, development, and teamwork. Future updates will expand gameplay and improve user experience.
